Dual-Motor Lift & Recline

ORDER CODE: 180DUAL

Dual-Motor operation for optimum comfort and functionality

Lift recline chairs are an ideal accompaniment to chairs specifically designed and engineered for the elderly and people with disabilities.

180kg - Electric Lift & Recline (Dual-Motor) is a robust lift chair mechanism that has been tested to support a 180kg weight capacity

This heavy duty lift and recline is available on the Hudson, Barwon and Cloud lift chairs. Oscar Recommends upgrading to the 180 series for any customers over 120kg or for customers with disproportionately large legs.

As usual with Oscar lift products, this mechanism comes fitted with quality LINAK electrics as standard.

Attributes Include:

- Maximum seat elevation with superb stability from Full-Recline to Full-Lift position
- Easy-to-use power motion controls.
- Optional user defined memory positions

Key Features & Benefits:

- Dependable dual-motor operation
- Maintenance free LINAK motors and electrics
- K.D. Back system for easy back removal while transporting
- Tested to 180kg maximum weight capacity
- Mechanism has been field-tested and proven in a controlled testing facility
- Wide-stance construction provides greater side-to-side stability
- Durable steel base and cross supports
